

Your family.  
Your home.  
Your energy.

Living clean energy

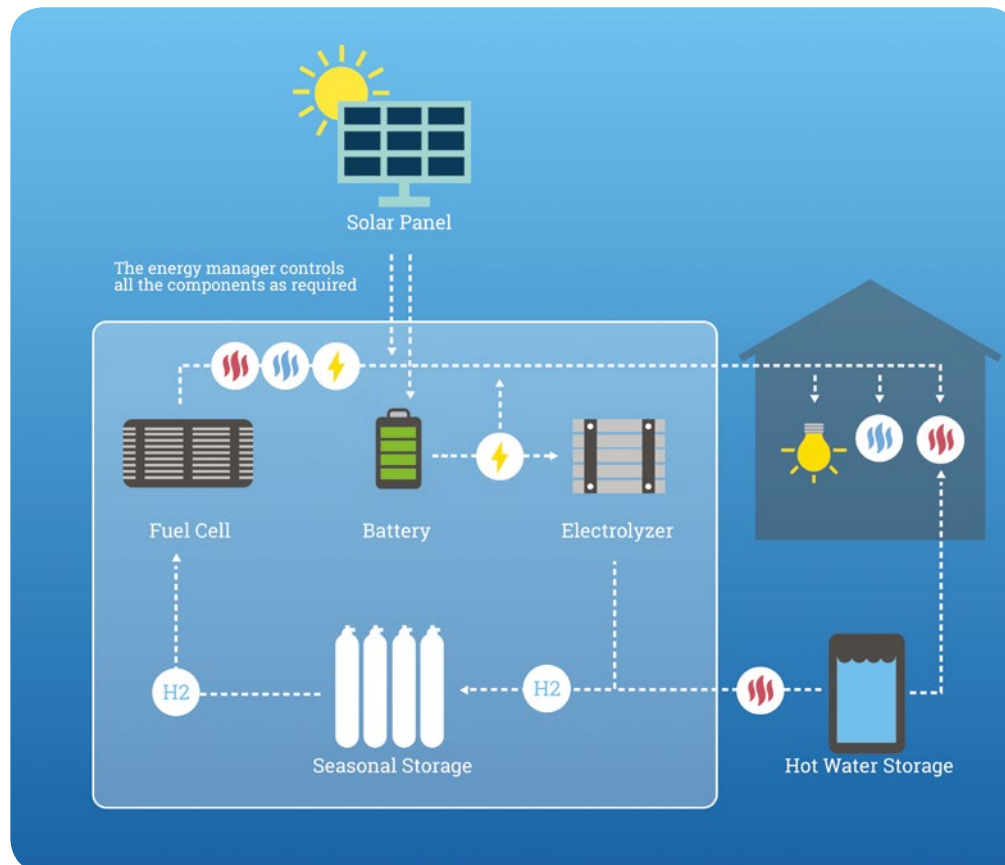

# HPS enables grid independence

HPS allows you to maximize your independence. All energy produced is efficiently stored and converted. Get the best out of your photovoltaic solar system with HPS.

HPS has developed a system in which components such as a battery, electrolyzer and fuel cell all work together efficiently. Predictive energy management creates a sustainable, self-sufficient and customizable house energy system. This offers you energy storage, heating support and ventilation unit, all-in-one.

Energy center and battery storage system as all-in-one unit

## Reliable energy in all four seasons

Spring, summer, fall and winter, whether electricity or heat: With HPS you can optimally use your self-generated energy throughout the year.

- 100x more storage capacity than commercially available home storage batteries
- Twice as much power as other systems
- 100% real independence
- 100% transparency
- 100% renewable

Experienced. Passionate. Enthusiastic.  
We strive to change the world  
with our work.
